

City of Colorado Springs,

I would like to have a large home license for a childcare at 7023 Sapling Place.

I have been a licensed home childcare provider for over 18 years in Colorado Springs. While attending college I worked in childcare centers prior to opening my own childcare home.

We have been in our current home for ten and half years. Our home is over 6000 square feet and our lot is 15,438. We have a six foot privacy fence and I have trees planted all around the yard to help with the noise.

I was a licensed for a large childcare home in Briargate for five and half years so I understand that parents need to drop off and pick up at staggered times.

All of the children I currently have enrolled have at least one sibling in care also. One of the families has five children and has been with me for twelve years.

I have never had a noise or parking complaint.

I will not need to make any changes to my property to accommodate four additional children as everything has been inspected by the state

I will not need to hire outside help to assist with the children, we have four generations living in the house and one or more of them will have all the required training necessary by the state.

Thank you for your consideration

Erin Hatfield
