Hello, Rachel!

I'm a resident of Colorado Springs and it has been brought to my attention that there is due to be a cell tower put up off of Powers Road. I'm sure you have other people emailing you with concerns about it as they have proven to be very dangerous to the health of those around it, especially residents.

I encourage and beg you to do more research on 5G towers and their affect on life around them. Please be concerned for the citizens who have to live near it if you decide to put it in. Understand there are lives at stake.

Thank you for reading this,
Emily Kersey

RE: CPC CM1 18-00100 There has to be a better solution to this cell tower than by our residential area & our children. I can't make the Aug. 15th meeting but my voice should be heard. Radiation is alive and we the people of Stonecrest need to be heard. **FIND ANOTHER LOCATION.** I am a cancer survivor and can't tolerate more radiation, or I will have to move. Rachel, can you please forward this to the proper City Planning or whoever appropriate.

Thank You,
Joann Mc Gregor

Hi Rachel,

I'm not sure if this issue is already in motion or if input can make a difference, yet I found out there is consideration of a cell phone tower in my neighborhood. I would prefer not to have a cell phone tower in my neighborhood. This is the reference information I have.

Info:
File number: CPC CMI 18-00100
Location: CMRS Airport Creek Point- DN01471G

Thank you for your consideration.

CPC CMI 18-00100

This is in regards to the CMRS airport creek point- DN01471G

We are homeowners right behind the projected project site. This cell tower will negatively impact our home values and be very dangerous to our environment. Cell towers have been proven to kill pollinators aka bees, butterflies, etc. Bees are already in danger and we have a large population of them in our community. My yard is filled with butterflies and bees. If the bees and butterflies disappear anyone who grows their own food will have huge issues and all our beautiful plants, trees, flowers, grass, etc. That give us all clean oxygen will suffer. These cell towers are also extremely dangerous to human health in close proximity and have never been safety tested.

Dangerous for environment

Lowers home values

Dangerous that close to humans

Many other negative effects and not one positive.

We strongly oppose this project.

We **STRONGLY** oppose this!! Please **DO NOT** build this cell phone tower. We will do everything we have to to fight this. There are no safety studies done in relation to placing cell phone towers this close to people!!! This is ridiculous and we are very upset by the proposal of this.

Rachel,

We do not want 5G towers in OUR community. There is not enough scientific evidence showing that they are NOT detrimental to our health, both short and long term.

Thank you,
Tatiana

Good afternoon,

I learned through Nextdoor that the city is considering allowing a cellular service tower to be installed in the vicinity of Airport and Powers. Your email address was listed as the appropriate point of contact with the City.

My wife and I live in the area (4712 Frost Dr.). I am writing to SUPPORT this effort because my wife and I agree that there is no evidence that cellular towers pose risk of harm to humans, animals, or the environment. We are aware of junk science claims that purport that these technologies pose such risks; we therefore believe it is important to acknowledge that while the city may encounter a vocal minority who believe those claims, there are other citizens - whom you most likely won't hear from - who are supportive or indifferent.

Thank you for your time!
