I am opposed to this request. I live across the alley from her back yard. Since I am retired, I am home most of the day. The noise from her day care business is disruptive & annoying. I signed her petition a couple of years ago to increase her number of children, and immensely regret the decision. At that time, I had just moved to the neighborhood & didn't realize how disruptive her business is to the area. She has children there until early evening & weekends. This area is a settled, mature neighborhood, usually pretty quiet, except for the noises from her yard - children screaming & crying and adults disciplining the children. I was not advised of this existing business when I purchased, I am concerned about the possible decrease of the value of my property when I sell my home. I don't believe it is the best interest of the neighborhood nor the children for an increased number of children for this business to be taken care of in her small residential backyard.

Sincerely,

Anita Robinson
