Councilmember Williams asked if Colorado Springs Utilities (CSU) already utilizes a three-year rolling average. Ms. Burgess stated the three-year period is currently used for water planning purposes.

Councilmember Murray asked how much water the City currently has available. Ms. Burgess stated approximately 95,000 acre-feet of reliable source of water and the City is currently using approximately 75,000 acre-feet of water. Aram Benyamin, Chief Executive Officer, CSU, stated they are working on defining those numbers to ensure they are verified.

Councilmember Murray stated this Ordinance does not have all the data needed in order to make a decision on it and how it will affect development within the City.

Councilmember Henjum requested there be a pause on this item until a robust stakeholder process regarding this very important decision regarding the future of the City's water supply is completed. Peter Wysocki, Planning and Community Development Director, and Mr. Benyamin stated they do not have an objection to putting this item on hold until a better understanding is achieved.

Councilmember Donelson stated he supports a postponement, but not pulling the rug out from under the projects which have already been approved.

would like to hear from experts regarding this.

Councilmember Avila stated there needs to be adequate water supply whether the development is within or outside the City limits.

Councilmember Williams asked if the twenty-five percent contiguity requirement would exclude flagpole annexations. Ms. Burgess stated it would not, the calculations would be done differently. Mr. Wysocki stated the proposed Amara annexation needs to be reviewed separately from this item.

President Pro Tem Helms asked if potential developers would make investment decisions regarding this proposed Ordinance. Mr. Benjamin stated the numbers of water supply and forecasts will frequently be made available to the public once they are finalized.

Councilmember Murray stated until the data is confirmed, he does not see how the threshold of 130 percent available water supply can be finalized in assessing new development.

Councilmember Henjum requested the total number of potential annexations and water extension requests be provided to City Council. Mr. Wysocki stated he will provide that information.

Councilmember Avila asked if the potential annexations are already considered in the forecast of water supply. Mr. Benjamin stated the growth rate of the City has been factored into the 126 percent available water supply calculations.

Councilmember Avila requested a twenty-thirty-year graph to see the changes over the years. Mr. Benjamin agreed to provide that information.

Councilmember Murray stated there needs to be an integrated discussion regarding how this Ordinance affects future annexations.

Councilmember Fortune stated she supports a postponement until the details can be worked out and a better understanding is achieved.

Marla Novak, Vice President of Government Affairs, Housing and Building Association of Colorado Springs, stated they support a further review process and will be looking at this Ordinance and how it would impact affordable housing.
