

ELECTRIC RATE SCHEDULES

ELECTRIC COST ADJUSTMENT - ECA

APPLICABILITY

Applicable to all rate schedules that are subject to an Electric Cost Adjustment (ECA).

ELECTRIC COST ADJUSTMENT

The ECA will be computed, as follows:

The sum of:

- a) the forecasted generation fuel, purchased power, and related costs for the future recovery period determined by Utilities plus
- b) an amount determined by Utilities as a projected over or under collected balance at the end of the recovery period used in a) above less the over or under collected balance of fuel and purchased power costs at the beginning of the recovery period.

Divided by:

- c) forecasted sales subject to the ECA for the same period used in a) above.
