Section 2. Section 509 (North Nevada Avenue Overlay) of Part 5 (Overlay Districts) of Article 3 (Land Use Zoning Districts) of Chapter 7 (Planning, Development and Building) of the Code of the City of Colorado Springs 2001, as amended, is created to read as follows:

**7.3.509: NORTH NEVADA AVENUE OVERLAY:**

A. Purpose, Goals, Applicability and Objectives:

1. Purpose and Goals: The purpose of the overlay is to implement the goals of the Master Plan adopted for the geographic area of North Nevada Avenue as illustrated in the map below. The goals include:

- a. Create a creative mix of business types and uses that support and employ our residents and serve as a regional economic magnet;
- b. Strengthen connections within the area and to the community by improving roadways and expanding transit service;
- c. Strengthen housing option that serves the need of existing and new residents and offers options for all ages and levels of income; and
- d. Integrate the corridor's streets, sidewalks, drainage, streetscape and other City infrastructure.

2. Applicability: The overlay applies to the area generally described lying south of Garden of the Gods/Austin Bluffs, east of Monument Creek and Cascade Avenue, west of Weber Street and Stone Avenue and north of the Old North End at the railroad right-of-way. The overlay is broken into three (3) sectors, the north, central and south.

3. Objectives: The overlay encourages new investment while ensuring that redevelopment balances private investment objectives with community sustainability. This is accomplished by:

- a. Orienting buildings towards the street and/or City trails/waterways to encourage pedestrian accessibility & walkability;
- b. Fostering the development of mixed uses;
- c. Encouraging multi-story buildings;
- d. Promoting aesthetically pleasing building design;
- e. Encouraging the incorporation of community and sustainable places and landscaping, including public art, public spaces, low impact water quality control, and LEED certified building design, which in turn enhance the desirability of the corridor; and
- f. Minimizing visibility and impact of parking lots and service areas by locating significant parking and service access away from primary streets.

B. Development Standards

1. Building Setbacks: Front yard setbacks are established as a build-within zone, buildings, or portions of it, must be located within the distances specified below within each of the sectors. Rear and side yard setbacks will utilize a standard minimum building setback as specified below within each of the sectors:

Front Yard Build-to zone:

South sector: zero (0) to fifteen (15) feet

Central sector: fifteen (15) to eighty (80) feet

North sector: fifteen (15) to sixty (60) feet

Rear Yard Setback:

South sector: five (5) feet<sup>1</sup>

Central sector: fifteen (15) feet<sup>1</sup>

North sector: fifteen (15) feet<sup>1</sup>

Side Yard Setback:

South sector: five (5) feet<sup>1</sup>

Central sector: five (5) feet<sup>1</sup>

North sector: five (5) feet<sup>1</sup>

2. Building Heights: Base zoning height maximum applies. Height bonuses shall be granted to a maximum of sixty (60) feet if the development includes any three (3) or more of the following:

- a. Publicly accessible green spaces/plazas/detached sidewalk that either front a street or connect to sidewalks/trails;
- b. Publicly displayed art that is minimum 1% overall project cost;
- c. Affordable housing (as defined by the U.S. Department of Housing and Urban Development) and/or mixed-income housing;
- d. LEED certified building plan design;
- e. Adaptive reuse of historically significant buildings;

---

<sup>1</sup> Zero foot (0') setback is permitted if part of overall concept or development plan.

f. Use of aesthetically-pleasing low impact water quality controls that are accepted by Water Resource Engineering; and

g. Shared parking between adjacent properties.
