Subject: RE: Fence

Leigh Anne,

Please consider this email confirmation of the City lifting the stop work order. After speaking with the state, and receiving your email below, we will not need an erosion control plan for the fencing construction relating to ranching operations. However, please understand a grading and erosion control plan will certainly be required for work relating to the development portions of your site.

Thank you,
Richard

Richard Mulledy, P.E.

Hi Richard,

We have installed fences since 1949. We and currently and will continue to install and repair fencing for our ranching operations. We will assure that no sediment will leave the site as a result of our fencing endeavors.

Leigh Ann
