[Signed Resolution 37-21](#)

Aram Benyamin, Chief Executive Officer, Colorado Springs Utilities (CSU), gave an overview of the extreme weather event which occurred February 13 through 16, 2021, the impact it had on the fuel prices, the natural gas price adjustment to recover those fuel costs over fourteen months, and how CSU will help customers with these unexpected utility costs.

Councilmember Knight requested how customers were contacted during the extreme cold weather conditions. Mr. Benyamin stated they utilized web casting and social media. Councilmember Knight recommended that in the

event of an emergency, they email customers.

Councilmember Knight requested an estimate of how much Drake 7 would have saved if it had been operational. Mr. Benyamin stated they will provide that estimate.

President Pro Tem Strand asked if the additional amount paid for utilities during these four days was \$104M. Scott Shewey, Chief Planning and Finance Officer, CSU, confirmed that was the estimated amount as of February 22, 2021.

President Pro Tem Strand asked why CSU did not hedge for an event like this. Mr. Shewey stated there are two types of hedging, physical and financial and CSU physically hedged which saved approximately forty percent of the cost, but it has not been engaged in financial hedging due to the risk involved in it.

Mr. Shewey presented the Resolutions increasing Gas Cost Adjustment (GCA) rate effective March 11, 2021. He gave an overview of the supply/demand issues, February prices, natural gas forward curve, 2021 forecasted fuel related expense, GCA alternatives, and sample total monthly bills. He identified the seasonal increase to monthly gas bills, customer information, cost adjustment information channels, and how CSU will help their customers.

Councilmember Knight stated the Budget Committee and staff have always been cognizant of sticker shock by extending the Large Power and Light (ELG) electric rate out three years, non-potable water rate out four to five years, the Electric Supply Credit is being reduced once a quarter over an extended period of time, and he supports doing the same thing for all CSU customers. He stated by taking the residential volume and adding the Electric Cost Adjustment (ECA) increase which will be coming before City Council in approximately two weeks, Option 1 will increase the maximum monthly residential bill by \$100.00, Option 2 will increase it by \$52.00, and if the rate increase was extended over twenty-three months, Option 3, the increase would be \$40.00. Councilmember Knight stated he supports Option 3.

Councilmember Williams stated he is concerned with the period going beyond Option 2 because there could be an incident in the next heating

season, and he does not foresee there being an increase in the supply of natural gas.

Councilmember Gaebler asked what CSU's preferred option is. Mr. Benjamin stated Option 2 because they feel it is the most balanced option.

President Skorman stated he also supports Option 2.

He provided a brief summary, area and district map, costs being reimbursed, City Council Resolution limitations, questions/comments from the Budget Committee, and next steps.

President Pro Tem Strand asked why the five percent taxable bond would be more beneficial than other financing options. Mr. Schueler stated the district would prefer to bond for more cost at a lower interest rate. Kevin Walker, representing the district, stated this developer is more interested in getting their capital back than the interest rate and the projections show the five percent interest rate is supported over a thirty-year bond.
