White Fiber Cement
Vertical Panels

Gray Fiber Cement
Lap Siding

Charcoal Fiber Cement
Lap Siding

Metal Panel

Partial Building Elevation

South Elevation at Central Elevator & Stair Access

NOTE: The purpose of the building elevations is to ensure compatibility between the proposed structures and the surrounding properties. The proposed building design will be finalized at time of building permit. Minor changes to the elevations, materials or colors will not require a development plan amendment provided the changes are in substantial compliance with the elevations approved with the Development Plan. Major changes may be considered as administrative amendments.
