---

**RESIDENTIAL SERVICE (SR)**

**AVAILABILITY**

**Inside City Limits**

Available in the corporate limits of the City in Utilities’ wastewater service area for general residential purposes.

**Outside City Limits**

Available outside the corporate limits of the City in areas where wastewater service is available from Utilities for general residential purposes.

**RATE**

See Rate Table for applicable charges.

**DETERMINATION OF BILLING UNITS**

Wastewater billing units will be billed based on either actual metered water consumption or the previous year’s winter wastewater average daily usage (ADU), whichever is less. New winter wastewater ADU calculations will typically be used for billing periods that begin after March 1st of each year.

**DETERMINATION OF WINTER AVERAGE DAILY USAGE**

A winter wastewater average daily usage will be based on metered water consumption using reads closest to, but not before, December 1st and closest to, but not after, February 28/29th. The winter wastewater average daily usage will be calculated based on water consumption between these read dates and the corresponding number of days between these read dates. For customers with less than 30 days of water consumption history with Utilities or zero water usage between these read dates, 33 cubic feet per day per residential unit will be used as the winter wastewater average daily usage.

**NONRESIDENTIAL SERVICE (SC)**

**AVAILABILITY**

**Inside City Limits**

Available in the corporate limits of the City in Utilities’ wastewater service area for general nonresidential purposes.

**Outside City Limits**

Available outside the corporate limits of the City in areas where wastewater service is available from Utilities for general nonresidential purposes.

**RATE**

See Rate Table for applicable charges.

**DETERMINATION OF BILLING UNITS**

**Normal Quantity Charge (NQC)**

The amount of water billed by Utilities for each billing period, less any applicable Consumptive Use Adjustment (CUA) or Irrigation Adjustment (IA), will be the basis for determination of the billing units for the NQC. For billing purposes, the Customer’s cf of sewer flow is assumed to be the same as the incoming water flow, unless it is reduced by CUA or IA adjustments as described in the following paragraphs. Approved CUA quantities (in cubic feet) are subtracted from the sewer quantities, reducing the NQC and sewer bill amount. For those Customers without Utilities’ water service, an alternative basis will be established representative of the Customer’s wastewater volume.

**Consumptive Use Adjustment**

Any Customer that does not discharge all of its water into the sanitary wastewater system exclusive of any IA may be eligible for a CUA in accordance with this section. Granting of a CUA will be at the sole discretion of Colorado Springs Utilities and does not apply to non-sewered Customers.

The CUA will be based upon the Customer’s measured consumptive use of water. All new CUAs require submetering by Utilities, using meters provided by Utilities.

The CUA provisions apply equally to both potable and nonpotable water provided the submetered consumption represents a reduction in treated effluent into the sanitary wastewater system.
