# ConnectCOS

TRANSPORTATION PLAN FOR A MOBILE COMMUNITY

Planning Commission February 8, 2023 Tim Roberts

# **ConnectCOS Transportation Plan**

#### What it is:

- Citywide analysis of needs relative to goals
- Identifies "Big Rock" Investments and Strategies
- Targets Key Themes
- Recommends Actions and Strategies
- Defines modal networks
- Adopted by ordinance
  - Major Thoroughfare Plan

#### What it isn't:

- Granular enough to be prescriptive
- Not just a project list or a 20year prioritized and funded program

#### **ConnectCOS Transportation Plan**

#### Provides

- 20-year look ahead
- Goal-determined needs
- Unconstrained Response to Needs (Projects and other Action)

#### Limits

- Should be updated in 5-7 years to address changes
  - Funding
  - Priorities
  - Technologies
- Needs remain until addressed or goals change

#### Public Engagement

**Stakeholders** 

**Public**

#### Level of Community Engagement Activity Engagement

CAC Meetings 8 Stakeholder Interviews 21 and Follow-up Meetings Strengths & Weaknesses 1700 responses Community Survey using 600 map-based Social Pinpoint comments Nearly 150 Virtual Public Meeting 1 Virtual Community Office 60 participants over Hours 4 sessions **Priorities & Strategies** Community Survey using 800+ response **MetroOuest** Nearly 130 Virtual Public Meeting 2 participants Digital Comment Card 44 responses In-person Public Open Houses by **Council District** 

participants

#### **Technical Analysis**

- Goal Framework
- Review
- Development of potential projects
- Project evaluation
- ConnectCOS and PPRTA Outcomes

#### How do we improve the system?

Safe	Equitable	Sustainable	Efficiently Reliable	Accessible	Connected
Crashes Emergency Response Work Zones Personal Safety	Appropriate to Need Distributed Investments Context Specific	Economy Environment Quality of Life	Reliable Travel Times People Capacity Good Repair	Intuitive Comfortable Seamless Modal Connections	Desired Land Use Neighborhoods Activity Centers Regional Economy

- Assess where the system is not meeting goal expectations (Needs)
- Identify actions that would generate high return in performance (Solutions)

### Modal Networks

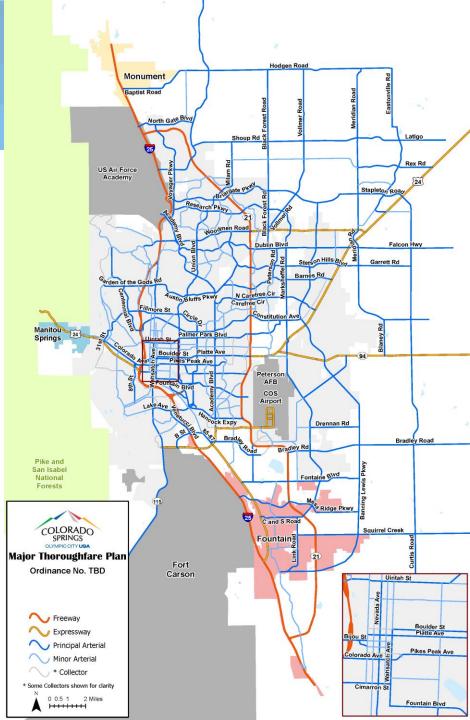

- Roads
- Transit
- Active Modes (Bike, Pedestrian)

# Major Thoroughfare Plan (MTP)

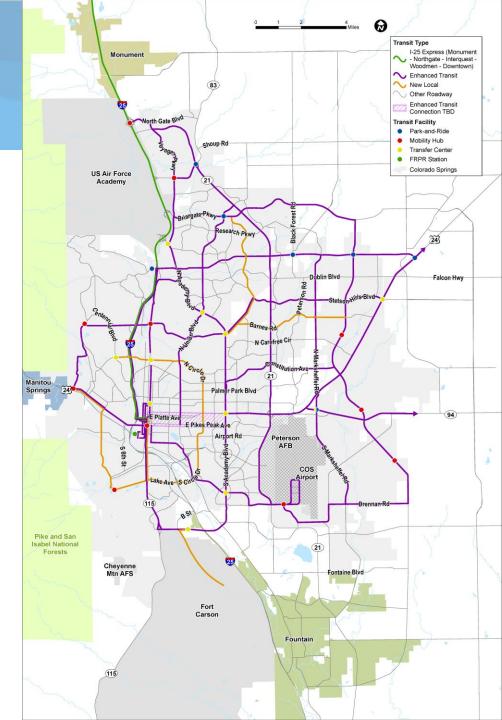

The MTP is part of City code:

- Governs how the City operates and how it grows and develops.
- Guides the development of appropriately sized transportation facilities to serve the needs of the community as development occurs by:
  - Directing transportation design standards
  - Identifying right-of-way that needs to be preserved for transportation facilities as growth occurs or areas that may be annexed in the future.

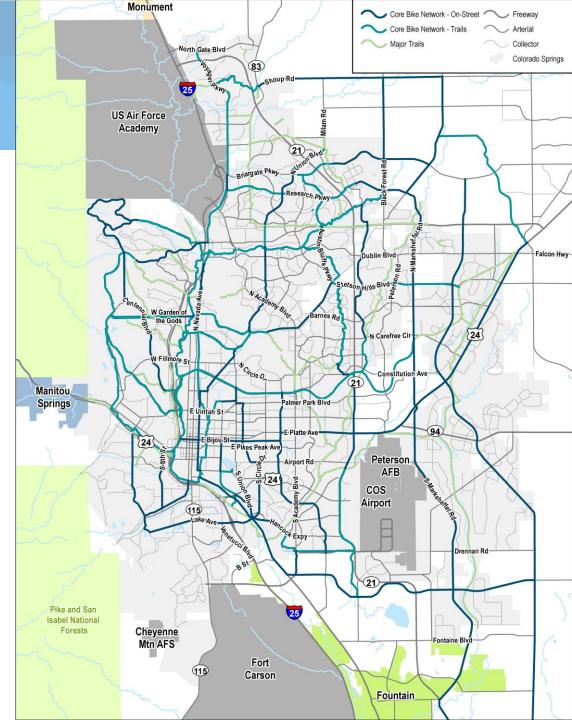

# Transit Vision Network (TVN)

- Next Level Transit
  - Enhanced Transit
  - Transit facilities
- Communicate intent
- Direct future studies

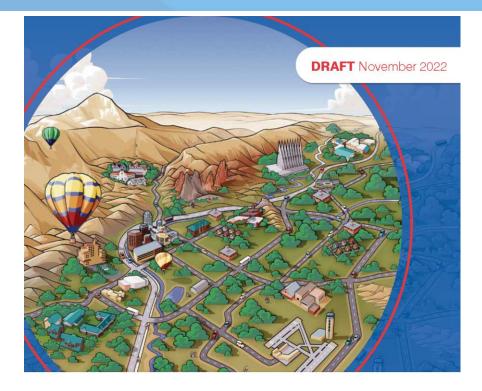

#### Active Transportation Network

- Establish functional network for Bikes and Peds
  - Off-Street
  - On-Street dedicated
- Communicate intent
- Direct future studies

#### ConnectCOS – The Plan

# Plan Outline

- Purpose
- Engagement
- Vision and Goals
- Network Assessment
- Citywide Needs and Strategies
  - Regional connections
  - Developing Technology
  - Right of Way Allocation
  - Maintenance
  - Travel Demand Management

- Recommendations
  - Projects
  - Modal Networks
    - Major Thoroughfare Plan
    - Truck Routes and Freight
    - Transit Vision Network
    - Active Transportation Network
  - Implementation and Next Steps
    - Funding
    - Future Planning

#### Feedback by the Numbers

- 174 comments submitted through the website
  - 161 during the formal comment period
  - 13 after the close of the formal comment period
- 252 comments emailed to the project email
  - 122 during the formal comment period
  - 130 after the close of the formal comment period
- 426 total comments

#### **Comments on Draft Plan**

# A Range of Comments

"This Plan continues the charade that transit/bicycle/pedestrian improvements solve the traffic issues/congestion for the future."

"Unfortunately, the document is heavily focused on motorized transportation, in particular automobile traffic."

"Why have you rubber-stamped subdivision after subdivision knowing full well the traffic nightmare it would cause?!?!"

- Prioritize citywide network connectivity including E/W
- Historic Neighborhood Preservation
- Support for multimodal travel to help reduce congestion
  - Conflicting views on where this should be done in the city
- Interest in regional passenger rail
- Support for increased bicycle facilities and safety features
  - Concern about bicycle lanes being on congested roadways citing safety and traffic issues
  - Desire to ensure current facilities are maintained and improved
  - Desire for new facilities to focus on increasing connectivity safely

# Key Themes (continued)

- Support for enhanced transit service throughout the city
  - Getting downtown from various sectors of the city
  - Additional services besides bus transit (light-rail, subsidized rideshare)
- Desire to preserve community character
  - Concerns on widening North Nevada
  - Concerns about Constitution extending to I-25
- Desire for a better understanding of what happens next (when a project is funded)

## Changes from DRAFT Plan

- Refinements based on feedback from public and CTAB
  - Additional emphasis on safety (CTAB Recommendation)
  - North Nevada Corridor
  - East West Mobility

# North Nevada Corridor Changes

#### Major Thoroughfare Plan Change

 Additional Project Guidance developed with neighborhood

#### North Nevada Safety Study Project #158

The project will:	The project will not:
Be conducted through a public process in partnership with affected neighborhoods	Consider an alternative of more than two traffic travel lanes in each direction
Evaluate, identify, and implement improvements to enhance safety, mitigate traffic speeds through consideration of a full spectrum of traffic calming strategies	Consider an alternative that impacts existing medians and trees or reduces or eliminates parking or driveways except as necessary to implement accepted strategies
Implement design characteristics consistent with traffic operations of 30 mph or lower.	Eliminate or reduces school safety zones
Enhance walkability including street crossings for pedestrian and cycling safety	Forcefully acquire additional right of way
Be consistent with the ConnectCOS Goal framework, PlanCOS guidance including the Urban Core Street Typology, and in pursuit of the equitable distribution of non-local traffic to the entire arterial street grid as described in the ONEN Master Plan adopted by City	"Kick the can down the road", but will recommend a specific way forward that averts future revisits of the same discussion

Ordinance in 1991.

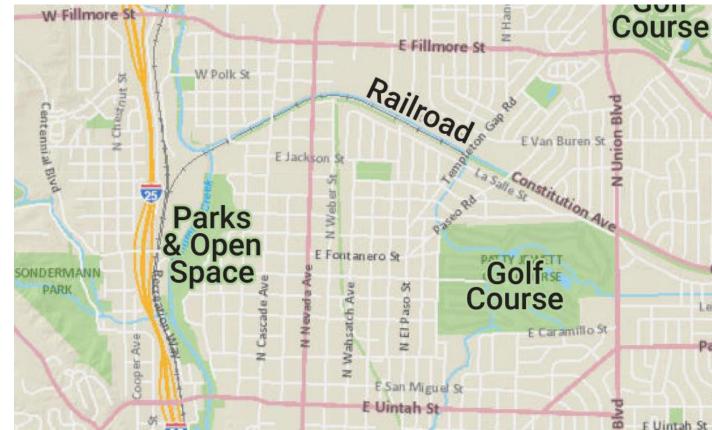

#### North Nevada Transit Project #143

- Nevada/Weber Enhanced Transit Corridor Feasibility, Planning and Design
- Changed from implementation to planning, environmental clearance, funding and functional assessment through public process

#### East West Mobility

- Project #105-Recommended Study
  - Improve mobility for all modes
  - Add transit functionality
  - Consider alternatives other than widening in constrained ROW
  - Potential uses for rail ROW

#### East West Mobility Feedback

- 231 email and website comments reference or mention the Constitution Extension to I-25
- Most comments\* are from residents sharing concerns around if the extension would occur:
  - Noise and air pollution
  - Safety
  - Inducing demand and increasing congestion
  - Designation of the road as an arterial
- Several comments support the investigation citing the need for better east-west mobility and more options for drivers

\*Note, many were submitted with a pre-populated comment form created by community members

#### East West Mobility

- Changes from Continued Engagement
  - Town Hall Meetings
  - Discussions with Neighborhood Leaders

- CTAB
  - Specific Recommendation

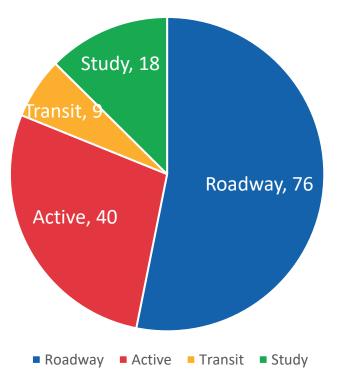

Project	Old Name	Limits	Old Description
#			
105	Constitution	I-25 -	Conduct study to determine the feasibility of extending
	Ave Feasibility	Union	Constitution Ave from Union Blvd west to I-25 as a
	Study - I-25 to	Blvd	limited access, multi-modal roadway while minimizing
	Union Blvd		neighborhood and school impacts
	New Name		New Description
105	Central	I-25 -	Conduct study to determine multimodal strategies for
	Colorado	Powers	improving east -west mobility while prioritizing the
	Springs E-W	Blvd	value of existing neighborhoods within the study area
	Mobility Study -		bounded by I-25 on the west, Powers Blvd to the east
	I-25 to Powers		and including the Fillmore Street and Uintah Street
	Blvd		corridors. Consider regional influences of planned
			projects and updated information from the Transit
			Vision Network, 2050 Regional Transit Plan, and the
			2050 Regional Travel Demand Model.
			Alternatives may only consider the use of any
			Constitution extension for transit or non-motorized
			travel, alternatives that use propose uses for car and
			truck travel lanes will not be considered.

#### **ConnectCOS Recommended Projects**

#### **Needs-based Project Summary**

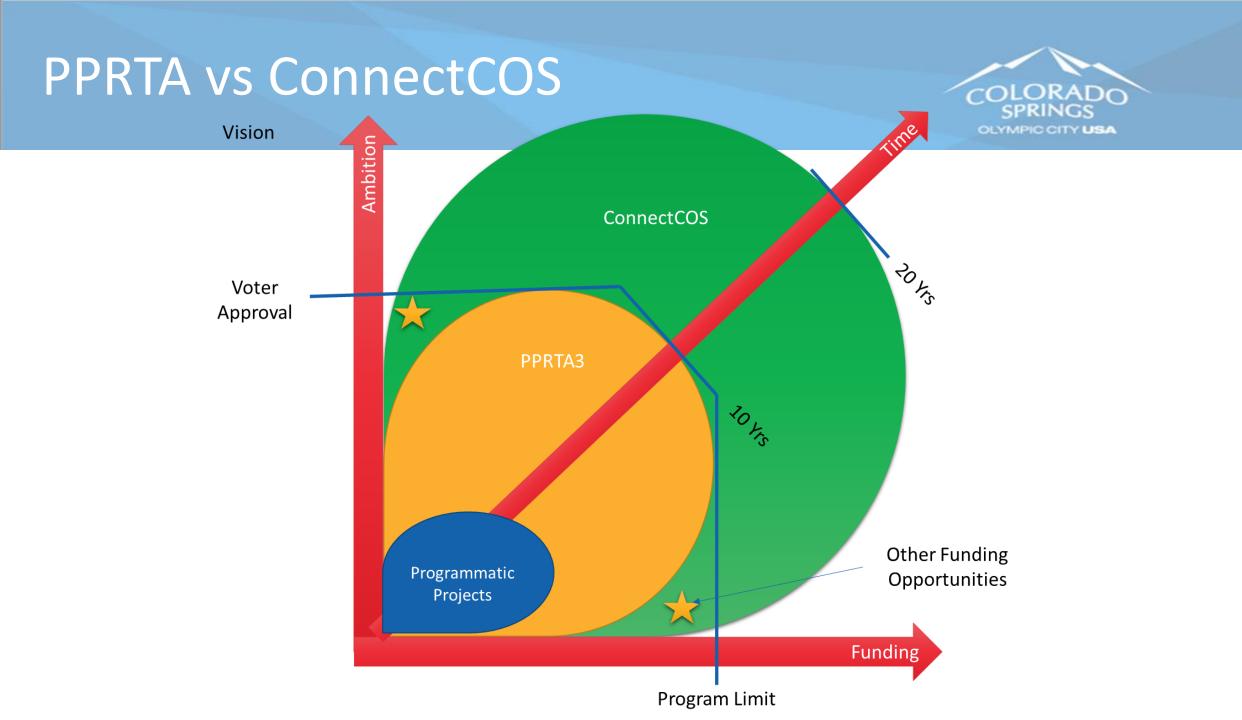

Critical Corridor	# Projects	# Segments
Academy	10	3
Austin Bluffs	6	1
Briargate	2	1
Colorado	10	1
Fillmore	11	2
31 <sup>st</sup> /Fontmore St	6	1
Garden of the Gods	6	1
Hancock	6	1
Interquest	3	1
Marksheffel	6	2
MLK Bypass	1	1
Nevada	27	4
Platte	13	2
Powers	13	3
Union	6	4
US 24	4	1
Woodmen	10	2
TOTAL	140	

- All Roadway projects include multimodal elements
- 72 projects associated with multiple critical corridors, 13 associated with more than 2 critical corridors
- 34 site specific + 9 trail programs
- 51 sidewalk projects
- 38 on-street bikeway
- 69 targeting capacity at congestion hotspots

#### Other Programs

PR01	State and Federal Discretionary Grant Match Fund		
PR02	Companion Drainage Improvements for Roadway Projects		
PR03	Congestion and Incident Management		
PR04	Emergency Bridge Fund		
PR05	Intersection Improvements		
PR06	On-Street Bikeway Improvements		
PR07	Roadway Safety and Traffic Operations		
PR08	Sidewalk Infill Improvements		
PR09	Traffic Signal Systems Upgrades (City-wide)		
PR10	Transit Fleet Supplement		
PR11	Transit Service Enhancements		
PR12	Transit Stop and Station Improvements		

#### Summary

- What's new?
- What do I get?
  - Drivers
  - Transit Riders
  - Walk, Ride, or Roll
- Schedule

# What's New?

- Ongoing functionality
  - Actions developed from an assessment of goal performance
    - Six different goals define needs
    - Needs-driven actions
  - Needs list remains until actions address
- Transit Vision Network
  - How to take transit to the next level
- Active Transportation Network
  - Considers only off street or dedicated on-street facilities
- Systemwide strategies
  - Context specific design typologies
  - Right of Way allocation

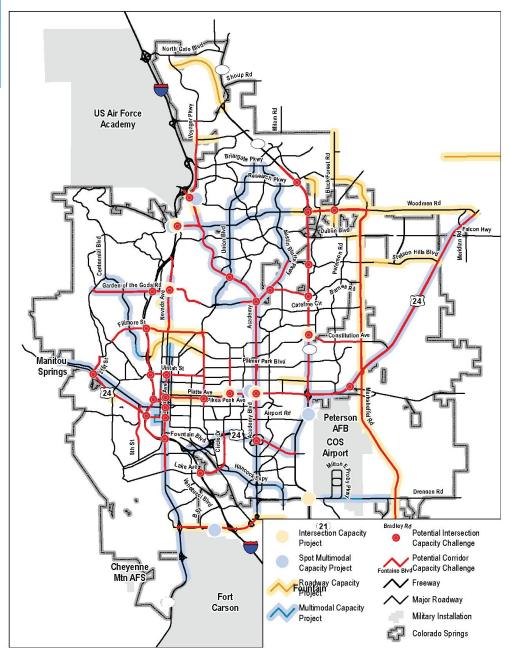

#### What Do You Get?

#### Comment:

"This Plan continues the charade that transit/bicycle/pedestrian improvements solve the traffic issues/congestion for the future."

 Response: 69 projects that target capacity improvements at known congestion hotspots

#### Congestion

# What Do You Get?

*Comment: "Unfortunately, the document is heavily focused on motorized transportation, in particular automobile traffic."* 

#### Transit to the Next Level

- Transit Vision Network
- Transit Programs with increased funding in PPRTA3
  - Transit Fleet Supplement
  - Transit Service Enhancements
  - Transit Stop and Station Improvements

#### Active Modes (Bike, Pedestrian)

- Active Transportation Network
  - Recognizes need for dedicated facility network
- Commitment to trails with nine programs in PPRTA3 plus 34 site specific projects
