

April 28, 2023
Greenstar Power LLC
3595 E. Fountain Blvd. STE 215
Colorado Springs, CO 80910

Greenstar Power LLC is installing a solar energy system at the residence of Paolo Bahr, 1820 North Tejon St in Colorado Springs, CO 80907. This address is within the Old North End District.

Please see attached design regarding layout, electrical equipment location, and module and inverter specifications for the technologies being utilized in this project. Any exposed conduit will be painted to match the surface below it to reduce visual impact. The detached garage was chosen as the least conspicuous place for the solar array, with all balance of system electrical equipment out of sight from the street. The garage is a simple hip roof without any historical character-defining features to be covered by the array. View of the garage itself from the street is mostly obstructed by trees. Solar modules will be mounted flush to the roof sections, about 3-5" from the surface.

Please let us know if we can provide any more information in support of this project.

Kind Regards,

Jennifer Paskow
