Hi Katie,

Things we would like to see addressed at the North Fork Meetings

Comment	Applicant Response
1.) We hope this e-mail finds you well. Concerning the Northfork	This comment is not related to the
development. As a neighboring property owner our biggest concern, as	North Fork Filing 3-7 application.
from the beginning, is the traffic impacts on the area. We realize that the	
area is developing quickly and our main concern is the Union/Milam Road	
connection being completed. The city knows as well as we do that the	
delay in the connection is being held up by La Plata by refusing to work	
with other developers to finish the connection based only on retaining a	
monopoly on the land in the area only. As you know, there is a developer	
willing to cooperate with La Plata to finish this connection. There have	
already been pre application meeting on the land that will require the	
connection to be completed anyways.	
We would like to see a requirement for La Plata to complete the	
Union/Milam connection or to cooperate with others willing to pay their	
share to complete the connection within 12 months of these pending	
approvals now requested.	
2.) We just want to assure that the D-20 elementary school property does	The D-20 elementary school
not border Howells Road as agreed earlier.	property does not border Howells
	Road as agreed earlier.
3.) Is High Valley Land Co. on track with the water system requirements in	This comment is not related to the
order to get COs from regional building department on filing 2?	North Fork Filing 3-7 application.
4.) Building restrictions heights need to be illustrated to show layman how	Building height definition can be
height is determined and only 30' feet max as per filing 1.	found in the City Zoning Code
