

In an effort to gather community support, neighbors created a petition to inform and rally the greater neighborhood to speak out. Here is what the petition states:

**We, the undersigned, call on the City of Colorado Springs to deny the construction application for Vertical Bridge to rebuild the dormant cell phone tower on the El Paso county land parcel 36-13-66. This tower will hold up to four high power RF cell transmitters that will disrupt quality of life for local residents and wildlife. This tower will cause financial hardship to local residents in the form of reduced property value and relocation costs for those who are concerned about the health implications. Protect the citizens of Colorado Springs and prohibit the construction of this cell tower.**

The petition was circulated electronically through GoPetition.com, a paper version was physically walked through the neighborhood and we engaged in a mailing campaign through the US Postal Service. 279 signatures were gathered online, 21 through the mailing campaign and 60 were handwritten on physical petitions. The online platform allowed for anonymous signatures, as many people do not feel comfortable sharing their physical or email addresses. We included those signatures as well as they came from independent IP addresses and they were people who took the time to get involved while protecting their privacy.

Scanned non-electronic signatures are available on request. The electronic version can be found here:

<https://www.gopetition.com/petitions/stop-the-homestead-trail-cell-tower-construction.html>

The table of signatories is included in the next several pages. This table includes names from all sources of the petition.
