- does 28' and 34' Street width accommodate large emergency vehicles? Officer + responder safety could be at risk and response delayed.
- lot premium was paid when the house was built - what legal protections do we have? Big Timber Dr. In the previous development plan, The builder (Rockwood) indicated they would limit these homes to one story along Big Timber. We have the email.

Neighborhood involvement helps guide the review process and provide valuable feedback about the proposed development to the City's decision makers.

- Maximum height for homes along Bridle Pass also need to be limited to 25' max to protect views of those across Bridle Pass. Would like this in writing .
- Please address density & lot size. Make houses @ the top of Bridle Pass and make similar in size & value to houses adjacent. Property values
- Please make fencing not split rail.
- Split driveways are a nightmare

Street names should match the neighborhood plan -  
names already existing. There is a theme in place.

I am in favor of this new build area. I know there are families that are looking for a home in a peaceful neighborhood. I know there are lots of concerns in the area ~~still~~ like the independent detached homes. I think 50 homes is too many for the space & agree that there should be fewer flag/ots. Ensuring homes along Bridle Pass will look like part of the neighborhood & if possible considering some views of ~~across~~ the mountains & open space.

*We want to know more about the Home Design facts. SQ footage, Basements (yes or no) will the homes be value compatible with the surrounding areas so that this development does NOT lower the areas value.*

*Kroebel@Comcast.net*

*The city needs to protect the value of the current owners in the area of the development.*

50 homes are WAY TOO MANY. We as a neighborhood use this space for working, playing, riding bikes, ~~etc~~. We would really like to have a park or some of it left for open space. We understand that Cottonwood is down the way but would you feel good or want your children to walk that far? Having a road that a driveway backs onto is not a good idea. The are no "internal streets" you still have to go through our current neighborhood & streets to get to them. Most households have 2 cars. That's 100+ cars!

We want to express our opposition to this 50 home project at the 10.71 acre Newport Heights. We've lived at 4652 Bridle Pass since May 2002, and when we bought the property & moved in this project was supposed to be a small park or Elementary School. Putting any large housing project will overwhelm our area and infrastructure, and in fact we have already seen a drop in our water pressure since the about of building started from Cottonwood Creek. Finally, adding 50 houses will significantly increase our traffic & hurt property prices. This land should be left as a park, or a small Elementary School as originally planned. Sincerely, Mark Carol Foor

The house next door to mine is under contract for \$445,000. The lot is huge ... a real backyard - this is one of the things that sets Newport Heights in the less desirable district of 11 apart. It's a reason to buy here. These tiny lots are not comparable to Newport Heights West. I will see the roof of every single one of these 50 homes. They do not match the existing neighborhood. That's it.

Thank you for your participation!

We do not approve of a PUD.

<p>Presenters were very biased. Could not answer questions or honest style of pieces of homes,</p>
<p>We need another meeting</p>
<p>No need of hearing about access to Cottonwood Trail of Rockwood Drss.</p>

As I look at the proposed development - it instantly impresses me as congested, cramped in.	Why not fewer homes - bigger - with a little breathing room in between?	How will this development age? How will it look in 50 years?	Last time we met the community said 44 homes was too many. Neighborhood involvement helps guide the review process and provide valuable feedback about the proposed development to the City's decision makers.	Now we have 50? Are you really listening or is this meeting merely a "symbolic" gesture?

<i>This Plan is far too crowded!</i>
<i>These Plan does not address the foot plan on Cottonwood Creek!</i>
<i>House seem to flooding Sehgal!</i>
<i>Time is now</i>
