

## Preserve 1895 Carriage House/Barn at 1327 N Tejon St.

We are restoring our original carriage house/barn that was build in 1895 at 1327 N Tejon St. Colorado Springs, CO 80903. This two story 42' W x 20' D x 24' H building was built directly on the ground and is needing to be restored and preserved by lifting the structure and pouring a concrete foundation to set it back down on. We have met with many structural engineers and have learned that this is the best way to preserve this historical building. All four sides/elevations will remain unchanged and the height will remain the same. The exterior damaged cedar shake siding will be replaced with the exact same material and repainted the same color it currently is. The roof will be re-roofed to match the asphalt shingles on the home. The overhead garage doors will be built out of wood.
