A Resolution Authorizing the City of Colorado Springs to Enter into Intergovernmental Agreements Between the City of Colorado Springs By and Through Its Stormwater Enterprise and Non-Standard Permittees Concerning the Coordination and Implementation of the COR070000 Non-Standard MS4 Permit

Presenter:

Richard Mulledy, P.E., Stormwater Division Manager, Stormwater Enterprise

Summary:

The Stormwater Enterprise has developed an IGA (Intergovernmental Agreement) to enter into agreements with Non-Standard MS4 Permit holders within the City's MS4 permit boundary.

Background:

The Colorado Department of Public Health and Environment (CDPHE) encourages Non-Standard MS4 permit holders such as school districts to obtain permit compliance by partnering with their local Phase 1 MS4 Permit holder. Due to the small size of most Non-Standard Permittees, it is difficult to provide a self-sufficient program to meet all requirements of the State Non-Standard MS4 Permit. Entering into agreements with local larger Phase 1 MS4 Permittees is beneficial for both parties.

The IGA between the City's Stormwater Enterprise and a Non-Standard Permittee will detail the responsibilities for different MS4 Permit requirements, including construction, post-construction, illicit discharge, and public education programs.

Previous Council Action:

N/A

Financial Implications:

A fee will be applied for each IGA which will be billed to the Non-Standard Permittee. The fee will be paid directly to the Stormwater Enterprise to offset operating costs related to participation in the IGA. There is no impact to the General Fund.

City Council Appointed Board/Commission/Committee Recommendation:

N/A

Stakeholder Process:

Stormwater Enterprise staff hosted meetings with local Non-Standard MS4 Permittees to explain the services that could be provided through an IGA.

Alternatives:

N/A

Proposed Motion:

Move to approve the resolution authorizing the City of Colorado Springs to enter into Intergovernmental Agreements between the City of Colorado Springs by and through its Stormwater Enterprise and Non-Standard Permittees concerning the coordination and implementation of the COR070000 Non-Standard MS4 permit.
