Proposed Motion:

AR FP 20-00539 - Final Plat

Approve the final plat for Kettle Creek North Filing No. 1 subdivision illustrating 74 single-family detached lots, based on the finding that the application meets the review criteria contained in City Code section 7.7.303, subject to the following conditions:

Conditions of Approval:

1. The standards for the Wildland Urban Interface, as set forth in the Fire Prevention section of Chapter 8 of the City Code, will be required and applied to all new construction in the Kettle Creek North subdivision.
2. There will be a 50-foot wide fuels management area, as described in City Code section 8.4.105-K102, along the northern boundary of the development and that Kettle Creek North's metropolitan district documents require the metropolitan district to maintain the fuels management area according to the requirements of that code section.
3. An access point to Howells Road will be constructed and maintained by the metropolitan district and must be sufficient for use by emergency vehicles and approved by the Fire Department.

Technical Modification:

- Add note to final plat: "Until such time as the new fire station located at Powers Boulevard and Highway 83 is operational, Colorado Springs Fire Department may have slower response times."
