WHAT IS AVIS?

AVIS –stands for Automated Vehicle Identification System

Legal definition: “A system whereby a machine is used to automatically detect a violation of a traffic regulation and simultaneously record a photograph of the vehicle, the operator of the vehicle, and the license plate of the vehicle...”

Practically: AVIS is the use of a camera and technology to capture violations of traffic laws. The technology and camera capture photos and video of traffic violations which can then be used to issue notices of violation and further enforcement actions.

CURRENT ORDINANCES

- City Code currently addresses AVIS violations in the following ordinances passed in 2010 and amended in 2021. These cover the implementation, deployment and judicial process for AVIS violations.
 - City Code § 10.1.115: Automated Vehicle Identification System AVIS
 - City Code §10.5.104F: Exceeding Posted Speed Limits: AVIS
 - City Code § 10.17.105C5: Traffic Control Signal Legend: AVIS
 - City Code § 10.1.202: Definitions
 - Sentences: City Code § 1.1.201 General Penalty and § 10.1.101 Penalties

BACKGROUND- WHY THE CHANGES?

- State Law: C.R.S. § 42-4-110.5 Automated Vehicle Identification Systems (1997)
- City of Commerce City v. State 40 P.3d 1273
 - Commerce City along with other home-rule municipalities including Colorado Springs challenged the constitutionality of provisions of the state law regulating AVIS systems, asking essentially whether home-rule municipalities are required to follow the state law.
 - Colorado Supreme Court ruled in 2002:
 - The regulation of AVIS enforcement is a matter of mixed local and state concern.
 - Therefore, state law supersedes municipal local ordinances and must be followed.
- City passes AVIS ordinances in 2010 and 2021
- State passed Senate Bill 23-200, which changed C.R.S. § 42-4-110.5 (effective June 2023)
- City must comply with new provisions and AVIS requirements – amendments needed

PROPOSED CHANGES

1. Come into compliance with new state law.
2. Simplify our code regarding AVIS penalties and requirements.
 1. Condense rules for AVIS violations into one section (instead of having rules spread over 3 ordinances).
 2. Update necessary penalty and definition sections.

PROPOSED CODE CHANGES

City Code	Summary
§ 10.1.115 Automated Vehicle Identification Systems (AVIS)	Repeal and reordain section of city code regarding AVIS requirements. Follow required state law regarding: implementation processes, enforcement procedures, sentencing provisions, and other regulations. This creates the one section of our code which governs procedure for both types of AVIS violations.
§ 10.5.104F Exceeding Posted Speed Limits: AVIS	Amend code subsection to simply state that Exceeding Posted Speed Limits may be enforced by AVIS, when in compliance with 10.1.115 (above).
§10.17.105C5 Traffic Control Signal Legends: AVIS	Amend code subsection to simply state that Traffic Control Signal Legends (red light) may be enforced by AVIS, when in compliance with 10.1.115 (above).

PROPOSED CODE CHANGES

City Code	Summary
§ 1.1.201 General Penalty	Amend the General Penalty section to exclude AVIS violations. AVIS penalties will be contained within §10.1.115.
§ 10.1.101 Penalties	Amend the Motor Vehicles and Traffic Penalty Section to exclude AVIS violations. AVIS penalties will be contained within §10.1.115.
§ 10.1.202 Definitions	Update relevant definitions based on changes to state law and section §10.1.115.

§ 10.1.115 : CONTENTS

PROPOSED NEW PROGRAM

- Speed Safety Cameras
 - Are a camera system that utilizes radar technology to track multiple lanes of traffic in one direction and photographs/records vehicles identified as exceeding the speed limit.
 - Research has shown a direct correlation between the impact speed of a vehicle striking a pedestrian and the severity of injury or death.
 - Goal is to use this alternative method as part of enforcement efforts.

IMPLEMENTATION

- Contract for 2 new vehicles equipped with Speed Safety Cameras
- Hire 2 new civilian employees to run the vehicles and record violators
- Post public notification on CSPD website regarding the implementation of the new Speed Safety Camera program
- Identify deployment areas in cooperation with Traffic Engineering
- Deploy the cameras in the following priority:
 - School Zones – Morning and Afternoon (Drop-off/Pick-up)
 - Parks/Residential Areas – In-between peak school zone times and during the summer
 - Construction sites – As requested

BENEFITS

- Addresses traffic safety, which is a top citizen concern throughout Colorado Springs.
- Targets areas with the highest numbers of child pedestrians, who are most at-risk of injury from impact with a speeding vehicle.
- They are a force multiplier as civilian employees can operate them allowing police resources to be available for other priorities.
- They are proven technology to help address dangerous driving behaviors, through enforcement of speed violations.
- They are mobile so there is equity in the deployment of them throughout the city.

QUESTIONS?

- CSPD Chief Adrian Vasquez, CSPD Cmdr Pamela Castro, and Prosecutor Shantel Withrow are willing to answer any additional questions at this time.
