Currently only have our house and a shed, we tore down an old horse barn and are constructing a new building in its place.

The building is going to be metal roof and metal walls.

We have started the process with regional building, zoning is approved. waiting for the engineered plan to get the permit, should have that in a couple of weeks.

Hello, Mr Forsthoff . We need to know :

- 1) How many other outbuildings are already on your property ?
- 2) Where on your property do you want to locate the barn ? 3) Also what materials will be used for the sides and roof ?
- 4) Have you already received a building permit from the city for this?

Thank-you .

Hello Tamie,

We are planning on building a Pole Barn on our property at [5202 Rocking R Dr, Colorado Springs, CO 80915](#). Wanted to submit a plan to you to get this approved prior to building.

Please let me know what you need to get this started.

Attached is the drawing of the building.

Thanks,

Paul
